

Notification of Coverage in Elsevier Bibliographic Databases
Gastric and Breast Cancer will be covered by **Embase** as of **2008**

Dear Editor-in-Chief,

In recognition of the high quality and relevance to the scientific community of the journal listed above, we are pleased to inform you that this publication has been selected for coverage in the Elsevier Bibliographic Databases indicated.

As you will no doubt already know, inclusion in abstract & indexing (A&I) databases increases the visibility and awareness of full-text journals. The A&I databases will drive usage and traffic to full-text platforms with sophisticated linking technologies, increasing journal brand awareness and subscription sales.

Our databases include standard A&I record components. Please be assured that we do not make any full-text available or provide content to any third parties.

In case you would like to notify users that the title mentioned above will be included in our databases as of January 2008, please keep in mind that the first articles will be available only after we have set up a subscription and arranged the delivery of issues.

Please feel free to contact me for additional information or to address any questions that you may have. Thank you in advance for your cooperation.

Sincerely,
Jaqui Mason (Ms),
General Manager Operations

***Elsevier Bibliographic Databases** produces a range of leading abstract & indexing databases, which scans the world's STM serials literature for coverage across all science and social sciences disciplines. Databases include Scopus, EMBASE, EMCare, Compendex, GEOBASE, EMBiology, Elsevier BIOBASE, FLUIDEX, World Textiles and several specialized niche databases and other derivative products such as Mosby Yearbooks.*

***Scopus**, the largest abstract and citation database of research literature and quality web sources, was created for researchers to help them find the quality information they need from around the globe. Since its introduction in 2004, Scopus has developed a solid customer base of over 1000 institutional customers worldwide enabling millions of users to make their literature research process more effective and productive.*
